TASKS 3 AND 4: READING COMPREHENSION

TASK 3

You will read a set of mixed-up paragraphs about Instagram. Read the paragraphs (A - I) carefully and list them in a logical and chronological order (1 – 6). This means you should order the events of the story in the order they happened – beginning with the least recent to the most recent. There is an example (0) at the beginning of the task. There are two paragraphs you will not need. Remember to copy your answers on the Answer Sheet.

The Instagram Story

A The Instagram app was launched only seven months after the first serious investment in the app, initially called *Burbn*. Unbelievably, it gathered 25,000 users in one day. By mid-December, the number of users reached one million. As an unexpected stroke of luck, the new iPhone 4 with an improved camera had just been launched. This rapid rise in the Instagram user base meant more investors became interested in the company, including an offer of around \$500 million, which Systrom declined.

B Although it was originally intended for a completely different purpose, the app had taken an unbelievable second rise ten years after it was first launched, when the option of *pet-matching* became available to its users. It was a type of a photo filter that automatically recognized your face in all of your posted photos, and turned it into a human-looking pet the app matched you with. Not only did this launch it into the startup investors' orbit, but it also brought about several formal offers from well-established businesses such as Facebook, Twitter, and Snapchat.

C An important turning point came in March 2010 when Systrom attended a party for another startup. At the party, Systrom met two investors who became interested in his idea and decided to meet for coffee to discuss it further. After their first meeting, Systrom decided to quit his job and focus on *Burbn*. He started building a team of people and the first to join him was 25-year-old Mike Krieger, whom he knew from their time as students at Stanford.

D While Systrom had no formal training in computer science, he learned to code on nights and weekends while working at *Nextstop*. He eventually built a prototype of a web app called *Burbn*, which was inspired by his taste for fine whiskeys and bourbons. The *Burbn* app allowed users to check in, post their plans, and share photos.

E After Krieger joined, the two reassessed *Burbn* and decided to focus primarily on one thing: photographs specifically taken on mobile devices. They carefully studied leading apps in the photography category at that time. They took a step back and stripped *Burbn* down to its photo-, commenting, and "liking" functions. It was at that time that they renamed their app Instagram, combining the words *instant* and *telegram*.

F As I've already mentioned, I like using Instagram for my personal visibility in life. I post everything I do and every place I go, and, of course, add loads of hashtags. My main account, which I opened in 2011, currently has five thousand users, but is growing steadily. I hope I will be able to earn money from my lifestyle content while at the same time doing what I love. That would be my dream job.

G Only two years after its launch, the app's user base had grown to approximately 27 million users. The company was soon thereafter acquired by *Facebook*, now *Meta*, for \$1 billion. By 2020 Instagram had one billion active users every month. While user growth has continued to increase since the *Meta* acquisition, Instagram has made a relatively small number of changes to the app, sticking to its simple and intuitive user experience and core focus on photo- and video-sharing capabilities.

H It all began in 2009, when Kevin Systrom, a 27-year-old Stanford University graduate, was working at *Nextstop*, a travel recommendations startup. Systrom had previously worked at *Google* as a corporate development associate and interned at *Odeo*, a company that would later evolve into *Twitter*, now *X*.

~~**I** The story of Instagram's explosive rise reads like a Silicon Valley fairy tale, with the company gaining popularity within just a few short months. The photo and video-sharing social media application took only eight weeks for software engineers to develop. But, like all good tales, the process involved many twists and turns, failures and successes, and a significant dose of good luck. Here, we will take a look at several key points.~~

About Walt Disney

A late British political cartoonist called Disney “the most significant figure in graphic arts since Leonardo.” A pioneer and innovator, and the possessor of one of the most fertile imaginations the world has ever known, Walt Disney, received more than 950 honours and citations from throughout the world, including 48 Academy Awards® and 7 Emmys® in his lifetime.

0) D He became interested in drawing at an early age and sold his first sketches to neighbours when he was only seven. At high school, Disney divided his attention between drawing and photography, while at night he attended the *Academy of Fine Arts*. After the war, Walt began his career as an advertising cartoonist in Kansas City. In 1920, he created and marketed his first original animated cartoons. Soon, he perfected a new method for combining live action and animation.

In August of 1923, Disney went to Hollywood with nothing but a few drawing materials, \$40 in his pocket and a completed animated and live-action film. Walt’s brother Roy O. Disney was already in California, with an immense amount of sympathy and encouragement, and \$250. 1) _____ It was soon used for making the first *Alice Comedy* short film.

Mickey Mouse was created in 1928, and was about to be used in a silent cartoon entitled *Plane Crazy*. 2) _____ So, Mickey made his screen debut in *Steamboat Willie*, the world’s first fully synchronized sound cartoon which premiered in the same year.

The technological innovations he introduced into the world of animated film were numerous. 3) _____ In 1937, *Snow White and the Seven Dwarfs*, the first full-length animated musical feature, premiered in Los Angeles. Produced at the unheard-of cost of \$1,499,000 during the depths of the Great Depression, the film is still accounted as one of the monuments of the motion picture industry.

Walt’s inquisitive mind and interest in education through entertainment resulted in the award-winning *True-Life Adventure* series. Through such films as *The Living Desert*, *The Vanishing Prairie*, *The African Lion* and *White Wilderness*, Disney brought fascinating insights into the world of wild animals. 4) _____

A pioneer in the field of television programming, Disney began production in 1954. 5) _____ Disney was not only a visionary, but a businessman as well. *Disneyland*, a huge amusement park was launched in 1955 as the fabulous \$17-million Magic

Kingdom, and by its fourth decade, entertained more than 400 million people, including presidents, kings and queens and royalty from all over the globe.

Thinking about the accomplishments he would leave behind, Disney said, "If I can help provide a place to develop the talent of the future, I think I will have accomplished something." 6) _____

Walt Disney is a legend, a folk hero of the 20th century. His worldwide popularity was based upon the ideas which his name represents: imagination, optimism and self-made success in the American tradition. Walt Disney did more to touch the hearts, minds and emotions of millions of Americans than any other man in the past century.

(Adapted from <https://d23.com/about-walt-disney/>)

A) However, before the cartoon was released, sound was introduced into the motion picture screen.

B) By doing that, Disney taught the importance of conserving our nation's outdoor heritage.

C) Sound was the first.

D) ~~The creator of Mickey Mouse and founder of Disneyland and Walt Disney World was born in Chicago in 1901.~~

E) The brothers soon started their business.

F) Technicolor, the multiplane camera technique, and combination of live action and the cartoon medium were among the first.

G) In a relatively short time span, he was among the first to present full-colour programming with his *Wonderful World of Colour* in 1961.

H) Pooling their resources, they borrowed an additional \$500 and constructed a camera stand in their uncle's garage.

I) Therefore, he took a deep interest in the establishment of *California Institute of the Arts*.
