Raspored

Razmjena podataka

Proces izrade rasporeda na FER-u

The screenshot displays the FER-u Timetabling software interface, which is used for creating and managing university timetables. The interface is divided into several main sections:

- Input Data:** A sidebar on the left containing various filters and search options.
- Instructional Offerings:** A central panel showing a list of offerings, including course numbers, subjects, and room assignments.
- Timetable:** A large grid on the right showing the final timetable, with columns representing time slots (e.g., 8:00a, 8:30a, 9:00a) and rows representing rooms (e.g., ENGR 100 LAC 1, ENGR 100 LAC 2).
- Search and Filter:** A search bar at the top right of the timetable grid, allowing users to filter offerings by room, time, or other criteria.
- Legend:** A legend at the bottom right of the timetable grid, explaining the color coding used in the grid (e.g., green for 'Available', red for 'Conflict').
- Statistics:** A section at the bottom left showing statistics for the current assignment, including the number of offerings, rooms, and time slots.

The interface is designed to be user-friendly, with clear navigation and a comprehensive set of tools for managing the timetabling process.

Academic Sessions

Screen Description

The Academic Sessions screen provides a list of existing academic sessions.

Details

- **Default**
 - Checked if a session is the default academic session
 - It identifies an active session with the nearest dates, if there is only one like that (e.g., all sessions are of the same academic initiative). If there is a default session, it is automatically selected when the user logs into the application, otherwise [Select Academic Session](#) or [Select User Role](#) page is presented.
- **Academic Session**
 - Name of the academic session

Academic Sessions

Name	Dates	Status
Ljeto 2014 (FER)	May 11, 2014 - Aug 15, 2014	Default
